

Interest Rates Are DOWN!

Can your agency afford to pass up these lower interest rates?

Will you be acquiring public safety, law enforcement, fire, school, IT, construction, public works, energy upgrades, hardware, software, vehicles, or equipment this year or next? **Our advice:** LOCK-IN prices AND the lowest interest rates we've seen in a while!

Lower your equipment financing costs for years!

EQUIPMENT COSTS ARE CREEPING UP: Inflation (nearly flat for years) is SLOWLY INCHING ITS WAY BACK. Sadly, we can't change that. Most governments will be spending more and/or getting less as inflation gnaws away at budgets.

BUT, INTEREST RATES ARE DOWN!: Don't sit out this opportunity to lock in historically low-interest rates on vehicles and equipment that you'll be benefiting from for 5, 10, or 15 years?

Interest rates are lower today, thanks to the Fed

Lock-in today's rates, or lose them!

NOTHING IS FOREVER. Get a free, fast, one-page lease-to-own quote using our lower-than-ever municipal rates for government fleet vehicles, equipment, hardware, and software. See real payments and interest rates now on whatever you're considering over the next few months. Deferring this opportunity will almost certainly cost you more. What's the downside looking at some real numbers?
